SUMMARY

Software Engineering graduate with hands-on experience developing and supporting enterprise capital-market software in Java, Oracle ADF and PL/SQL. Builds full-stack and distributed systems with Node.js, Express, Next.js, React, PostgreSQL and MySQL, with a focus on concurrency-safe, production-ready backends deployed with Docker. Experienced in delivering features, diagnosing production defects and supporting client deployments.

EDUCATION

B.Sc. in Software Engineering, Institute of Information Technology, University of Dhaka | GPA: 3.25 / 4.00
Higher Secondary Certificate (HSC), Dhaka College, Dhaka | GPA: 4.75 / 5.00
Secondary School Certificate (SSC), Al-Helal Academy, Sonagazi, Feni | GPA: 5.00 / 5.00

EXPERIENCE

Software Development Intern | Mar 2025 – Aug 2025
CAPITA (Capital Market Solution), LEADS Corporation Limited, Dhaka, Bangladesh

- Delivered 3 new features and enhancements for CAPITA, an integrated brokerage and portfolio-management platform covering investor KYC, trade execution, settlement and regulatory reporting, using Java, Oracle ADF and PL/SQL.
- Diagnosed and resolved multiple production bugs by reproducing issues, debugging Java and PL/SQL logic, deploying fixes and communicating status updates to stakeholders.
- Provided live production support to financial-institution clients, including environment deployments, release assistance and post-deployment troubleshooting to minimize downtime.

PROJECTS

Dhaka Tesla Pool – Ride-Pooling Platform | Next.js, Express, PostgreSQL, Docker

- Built a full-stack ride-pooling MVP where compatible passengers share a 3-seat vehicle at individual discounted fares, with passenger and driver roles, JWT authentication and an audited ride-status lifecycle.
- Prevented seat overbooking under concurrent requests using database transactions, row-level locking and constraints.
- Tested with Vitest and Supertest, containerized with Docker Compose and deployed live.

MIT Student Portal | Next.js, Node.js, Prisma, MySQL, JWT

- Independently designed and built a full-stack university portal for 200+ users with role-based dashboards (student, teacher, admin), JWT authentication, password recovery, course management, enrollment verification, notices, payment and payslip generation, and result viewing.

Rate Limiter and Load Balancer | Node.js, Docker, MinIO, MySQL

- Designed a containerized system demonstrating rate limiting and load balancing across services for a scalable, fault-tolerant architecture.

Monolithic to Distributed (Stack Overflow Clone) | HTML, CSS, JavaScript, Node.js, Express

- Collaborated in a team to build a Stack Overflow-style Q&A platform as a monolith, then migrated it to a distributed architecture to improve scalability.

Text2Code – Seq2Seq | Python, RNN, LSTM, BiLSTM, HuggingFace

- Built a natural-language-to-Python code generation system, benchmarking Vanilla RNN, LSTM and BiLSTM with Bahdanau Attention on the CodeSearchNet Python dataset.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, TypeScript, Python, PL/SQL
Backend: Node.js, Express.js, Oracle ADF, REST APIs, JWT Authentication, Prisma
Frontend: HTML, CSS, React, Next.js, Bootstrap, Tailwind CSS
Databases: MySQL, PostgreSQL, Oracle (PL/SQL), database transactions, row-level locking
Tools and DevOps: Git, GitHub, Docker, Docker Compose, Nginx, Postman, JDeveloper, Vitest, Supertest
Also familiar with: PHP, Django, MongoDB

ACTIVITIES

- Organized the IIT Tour, coordinating with alumni and managing participation for 300+ attendees.
- Champion in IIT Futsal, IIT Premier League Cricket and Short-Pitch Cricket tournaments; represented IIT in inter-department cricket and football.
